EDUCATION

Ph.D., Astronomy and Astrophysics Harvard University, Cambridge, MA Thesis: <i>Chemical Complexity at High Spatial Resolution during Star and Planet Formation</i> Advisor: Karin I. Öberg	2018 – Present
M.A., Astronomy and Astrophysics Harvard University, Cambridge, MA	May 2021
B.A., Physics and Astrophysics Secondary Concentration: Computer Science Magna Cum Laude with Highest Honors Harvard University, Cambridge, MA Thesis: <i>Carbon Chain Molecules Toward Embedded Low-Mass Protostars</i> Advisor: Karin I. Öberg	2013 – 2017

RESEARCH INTERESTS

I am broadly interested in exploring chemical complexity in space, with a particular focus on (sub)millimeter interferometry. I use high spatial resolution observations to study the chemistry and physics of star and planet formation, including toward low-mass protostars, massive young stellar objects, and protoplanetary disks.
